Pole Mounting Selection Checklist

Jieyao Lighting | 21 November 2026

Project: _____ Date: _____

Record the selected configuration and document reference. This worksheet supports project comparison; it is not an installation procedure or a substitute for the accepted design.

Item	Information to record	Project notes
Site basis	Location, authority requirements, ground conditions, utilities and exposure	
Required height	Above-ground shaft, arm rise, light-mounting reference and overall length	
Upper equipment	Arms, luminaires and every other attachment with its load information	
Direct burial	Designed root, ground-line datum, support material and cable-entry detail	
Anchor base	Plate drawing, anchor pattern, foundation design and finished-level interface	
Protection	Ground-line treatment, finish, drainage and field-repair provisions	
Replacement	Removal and reinstatement method; any proposed retained-foundation review	
Supply record	Pole marks, drawings, interfaces, inspections, packing and agreed exclusions
