# Road Layout and Pole Schedule Checklist

Jieyao Lighting | 21 November 2026

Project: _____ Date: _____

Record the selected configuration and document reference. This worksheet supports project comparison; it is not an installation procedure or a substitute for the accepted design.

| Item | Information to record | Project notes |
|---|---|---|
| Road brief | Plan, cross-sections, lanes, pedestrian areas, boundaries and criteria | |
| Arrangement | One-sided, opposite, staggered or median positions; authority acceptance | |
| Spacing datum | Pair interval, same-side interval or successive alternating interval | |
| Light position | Height reference, arm outreach, setback, tilt and luminaire orientation | |
| Photometry | Exact luminaire, output, optic and maintained assessment basis | |
| Constraints | Crossings, utilities, trees, barriers, foundations and service access | |
| Quantity | Accepted coordinates, endpoints, shared poles, arms and luminaires | |
| Product schedule | Unique pole mark, shaft, arm, base, fixture option and drawing revision | |
| Changes | Updated coordinates, calculation and schedule after each accepted revision | |
